

Recently restored and reupholstered this chair has all the mechanisms to make you want to never leave your living room. The back reclines and there is a sneaky foot rest that folds up under the seat.

They got the ergonomics right in this chair, the back even extends for those who are taller. The arms actually "bend" so that when fully reclined, they can be pushed out of the way. The design is way ahead of its time. It was originally built by Techno in 1955.
